What We Built

Arab Gift Card Ecosystem

A complete digital commerce ecosystem that powers Arab Gift Card's operations—built for scale, reliability, and seamless user experience.

1. E-commerce Website

Modern, responsive platform for digital gift card purchases.

2. Backend APIs

Robust RESTful APIs powering web, mobile & partner apps.

3. Admin Dashboard

Real-time analytics, order management & reporting.

4. Payment Gateway Integrations

Multiple secure payment methods with smart routing.

5. Automated Digital Delivery

Instant delivery of codes via email & in-app notifications.

6. Inventory Workflows

Stock control, automated updates & low-stock alerts.

7. Real-time Notifications

In-app & push notifications for orders & updates.

8. Search Infrastructure

Meilisearch-powered fast & relevant search.

9. Cloud Deployment

Scalable, secure deployment on DigitalOcean Cloud.

Operational Highlights

Real-time analytics dashboard

Live metrics and performance insights at a glance.

Payment gateway switching

Smart routing & easy switching for higher success rates.

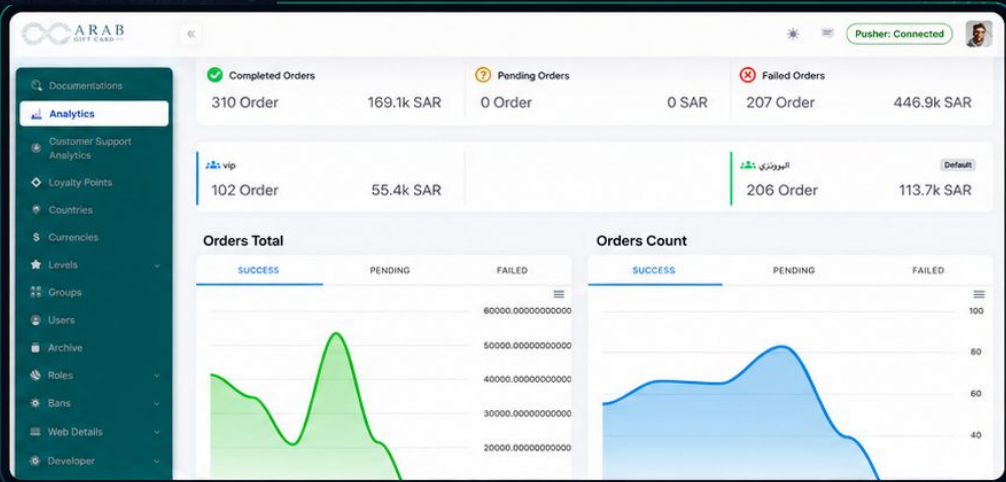

Net profit insights

Track revenue, costs & profit with actionable reports.

Automated deployments

CI/CD pipelines ensure fast, safe & reliable releases.

System Architecture

About Wasy

— Built around trust, timing, and the people you leave behind

Wasy is designed to turn sensitive digital legacy planning into something clear, calm, and dependable. This page explains who it is for and the values shaping the experience.

-  Trust-first design
-  Sensitive by default
-  Made for real families

Secure digital legacy with trust, peace of mind, and precision

Your Wasy story starts with you and ends with your loved ones safely receiving what matters most. Wasy is your trusted guardian for digital legacy, built to preserve stories, messages, memories, and vital information, then deliver them with the right timing and the right method.

Who Wasy serves

- 01 Families and loved ones
- 02 Travelers and expatriates
- 03 Retirees and digital asset owners

Cryoxel

— Advanced Cryoablation Planning Platform

Optimized tool selection

Intelligent recommendations to choose the best cryoablation tools for accurate and effective planning.

Updated todo list

Stay organized with real-time task updates and workflow tracking.

Project Summary

Purpose: Frontend web app for Cryoablation with DICOM viewing and segmentation UI, built on Create React App with the _metronic design system.

Core stack: React + TypeScript, CRA, SASS, MUI, Axios wrappers, plus charting (ApexCharts) and other UI libs.

Entrypoints: bootstrap in index.tsx and app shell in app/App.tsx.

Routing & Auth: routes live in app/routing/AppRoutes.jsx and guarded by PrivateRoutes.tsx; auth state lives in app/Auth/AuthContext.jsx.

API layer: use centralized axios instances in app/api/axios.jsx and app/api/hostAxios.jsx.

Technologies Used

Laravel

MySQL

Firebase

Pusher
